It is the eve of April 15th. As midnight strikes, Professor Gregg G. Burnett is poring over a pile of papers. "Taxes, taxes, taxes," he groans, "Why do I have to pay all this money in taxes? How does everyone else manage? And still put a little extra aside for retirement?" Gregg sighs. "It's all a mystery to me."

Taking the sting out of taxes needn't be a mystery. There *is* a simple solution. Supplemental Retirement Annuities from TIAA-CREF. Or, very simply, SRAs. The flexible tax-deferred annuity plan that can reduce your federal taxes and increase your personal retirement savings without shrinking your take-home pay.

Under current law, contributions to SRAs are conveniently made through your institution's payroll system *before* that money shows up as taxable income. So you don't pay taxes on it. Or on the interest and dividends it earns. You only pay ordinary income taxes when you receive your income benefits or withdraw cash from your SRAs.

Best of all, you don't have to wait until retirement to take your money out. So if you want to use part of your money *before* you retire—to build or buy your retirement house or send your children to college, you can. *Without* paying any federal penalty tax.

You can also begin receiving your income benefits at any age—again, without a federal penalty tax. And you can choose from a number of *lifetime* income options for you and your spouse.

This flexibility plus TIAA's competitive annual interest rate and CREF's broadly diversified common stock portfolio make SRAs more attractive than many other tax-deferred accounts. And with assets over $40 billion and more than 65 years of experience in retirement plan investing for people in education, TIAA-CREF helps provide financial security in these uncertain times.

So if *you* feel overtaxed like our perplexed professor, investigate the advantages of Supplemental Retirement Annuities. Simply mail the coupon to TIAA-CREF (Teachers Insurance and Annuity Association—College Retirement Equities Fund). Or call toll-free 800-223-1200 and ask to speak to an Individual Counselor.

SRAs—Simple. Reliable. Accessible. Tax-deferred annuities. From TIAA-CREF.

TIAA-CREF products and services are available only to staff members of colleges, universities, independent schools and certain other related educational organizations.

Continuing the Upward Climb

- ☐ Prospects for the future continue to look brighter than they have in recent years.
- ☐ For the second time since 1979-80, increases in salary for public institutions are at least equal to those for private institutions.
- ☐ Increases in salary levels expressed in real terms rose 2.5 percent.
- ☐ Increases in salary for continuing faculty averaged 7.3 percent.
- ☐ Salaries averaged $37,330, $31,990, $26,920 and $28,320 for institutions in Categories I (Doctoral-level), IIA (Comprehensive), IIB (General Baccalaureate), and IV (Two-year without academic ranks), respectively.

These highlights and others are discussed in the report by W. Lee Hansen, chair of the AAUP's Committee Z on the Economic Status of the Profession.

The faculty data used to prepare this report were provided by institutions that completed Form MEA 22. The AAUP annual survey was conducted by Maryse Eymonerie Associates, who were also responsible for editing, processing, and tabulating the data for this report. Data for 2,159 institutions are presented in the two Appendix Tables at the end of this report. Data for pre-clinical departments of medical schools, which in previous years have been presented in Appendix III, will appear in the next issue of *Academe*.

Continuing the Upward Climb

The Annual Report on the Economic Status of the Profession, 1985–86*

The news about the economic status of the academic profession continues to be encouraging. Over the past year real salary levels rose by 2.5 percent, about the same increase as the year before. This year's gain reflects a continuation of high nominal increases in salaries combined with the lowest inflation rate in years. If this combination of factors continues to hold over the next few years, faculty members may find themselves gradually recouping the tremendous loss in purchasing power they suffered in the 1970s.

Continued improvements in the economic status of the profession are essential if colleges and universities are to be able to cope with changes expected in the 1990s. For example, by the early to mid-1990s enrollments are likely to begin increasing again after a projected enrollment dip in the late 1980s. In addition, increasing proportions of faculty members will be retiring by the mid-1990s, reflecting the rapid buildup of higher education faculty members starting in the early 1960s. Taken together, this means that the demand for new faculty members will begin increasing sharply by the mid-1990s, just about the time that a newly enrolled freshman in fall 1986 might be expected to have completed a Ph.D. and be ready to begin a teaching and research career at a college or university. More than numbers are at stake, however. Improved salaries are required to help attract highly talented young people into the academic sector so that the quality of the enterprise is maintained. Thus, the increase in real salaries is encouraging, not only for present faculty members but for their potential successors who will carry on into the twenty-first centry.

THE SHORT AND LONG PERSPECTIVE

An overview of this year's developments is provided by Table I which shows the monetary and real increases in salary levels by rank over the past decade. Most striking is the sharp change that occurred beginning in 1980–81. Prior to that—indeed, back to 1973–74—real salaries declined each year. But now we see a string of five years in which real salaries increased and increased quite uniformly across the different ranks.

We can illustrate how the economic status of the profession has changed by calculating, as we have done for past reports, changes in the level of real salaries starting with the 1970–71 base year (1970–71 = 100). The decade of the 1970s was a disastrous one. The level of real salaries fell by 21 percent through 1980–81, largely as a result of the inability of faculty salaries to keep pace with inflation. Since that time the improved economic situation has led to real salary gains, pushing the index back up to 86.1. This means that an increase of 16.1 percent is required to eliminate the gap. But if the present trend continues that gap should steadily narrow.

WHICH COMPARISON?

Suggestions have been made by various observers that our focus on the economic status of the profession, as measured by average salary levels, as we used them above, hides the fact that faculty members who remain in the profession receive percentage increases in salary that exceed those for all faculty members. That increases for continuing faculty members are larger is not surprising because academic salaries, like those in most fields, tend to increase with age and experience. Of course, institutional changes are affected by turnover, but salary increases for continuing faculty members are not.

In any case, the argument made is that the data on percentage changes in salary levels, shown in Table 1, distort what is happening to the majority of faculty members who have committed themselves to academic careers.

The data on salary increases for continuing faculty members do indeed exhibit larger annual increases whether measured in monetary or real terms, as indicated by Table II. Over the period shown, increases in real salaries occurred in seven of the ten years; this compares with real salary increases in five of the eleven periods in Table 1

What happens when we compare real salary changes for the 1974–75 to 1985–86 period? (We use 1974–75 as a base because this is the first year for which we have appropriate data on continuing faculty salary increases). We find that average salary levels declined by 7.3 percent over this period, whereas the average salary level of continuing faculty members rose by 1.6 percent.

---

*The data for this report were collected, processed, and tabulated for the American Association of University Professors by Maryse Eymonerie Associates. Inquiries concerning the data presented in this report, the ordering of additional tables, or special tabulations should be directed to Maryse Eymonerie Associates (MEA), P.O. Box 520, McLean, Virginia 22101, telephone (703) 448-8519. Orders for additional copies of the Annual Report itself should be directed to AAUP, Suite 500, 1012 14th Street, N.W., Washington, D.C. 20005, telephone (800) 424-2973. (Price $25, prepaid order only).

[1] Monetary salary is salary measured in current dollars. The percentage increase in real terms is the percentage increase in monetary terms adjusted for the percentage increase in the *Consumer Price Index* obtained from the Bureau of Labor Statatistics (CPI on standard academic-year basis). Negative numbers = decreases.

* The changes in the CPI for the months of February through June 1986 have been estimated. As soon as the information becomes available, this figure will be revised if necessary and published in a subsequent issue of *Academe*.

What do we make of this comparison? Two observations are particularly pertinent. First, the simplest way to compare the economic gains resulting from different occupational choices is to examine average salary levels and changes in them over time. This information summarizes the experience of everyone in an occupation and thus is the most comprehensive piece of information available. Moreover, this information is available for large numbers of occupations, thereby permitting a wide variety of comparisons among occupations and over time.

Another approach is to focus on starting salaries and the rate of salary progression over time. This information is useful to people who wonder what their earning experience might be in a particular occupation. One dimension of such information is data on salary increases for people who continue in their jobs from one year to the next year, Unfortunately, this kind of information is much more difficult to obtain. Indeed, college professors are one of the few groups for which such data are collected. Thus having this information for only a single occupation is not very helpful. Were such data available for other occupations, they would also show more rapid rates of increase in real salaries for continuing as compared to all current employees.

Arguing that comparisons of average salaries distort what is happening to the economic position of faculty members seems inappropriate. Since the earnings of continuing employees in other sectors are also going up, the question is whether increases for continuing faculty members are equal to, greater than, or less than those for comparable occupations elsewhere. My guess is that these increases have been less.

THIS YEAR'S DEVELOPMENTS

Over the past year the overall increase in average salaries equalled 6.1 percent (see Table 1). This compares with a slight decline from the 6.6 percent figure last year. Virtually all of the decline can be attributed to the smaller increase for public institutions (6.1 percent as contrasted to 6.9 percent a year ago). It is difficult to know what to make of this decline, but it may reflect the problems some states have been experiencing because of revenue shortfalls. Meanwhile, the overall percentage increases for private independent and church-related institutions remained almost unchanged.

We show in Table 2 the distribution of percentage changes in average salary levels. Most striking is the substantial percentage of institutions awarding average salary increases of 10 percent or more: 28 percent overall, and 41 percent for public institutions as compared to 23 percent for private independent and only 12 percent for church-related institutions. This reflects the substantial efforts of numerous states to make up for their relatively smaller increases in previous years. Indeed, 1985–86 was a year of providing catch-up salary increases for faculty. The actual numbers of faculty affected by these increases are shown in the bottom panel of the table. Similar data for continuing faculty are also shown in Table 2.

At this point it is difficult to forecast what will happen next year because the eocnomic outlook has been clouded during the past few months when salary decisions were being made. On the other hand, private institutions, at least those with substantial endowments, have experienced exraordinary capital gains in their portfolios. This will place a number of private institutions, typically those with the highest average salary levels, in an exceptionally strong position to increase salaries if that is what they choose to do with their gains.

How did salary increases compare across the different categories of institutions? They were not uniform, as is clear from Table 1. Category I (doctoral level) and Category IIC (specialized) provided the most substantial salary increases, averaging 6.7 percent in each case. Category IIA (comprehensive) lagged well behind, with increases of under 5.5 percent; Categories III and IV (two-year colleges with and without ranks respectively) also exhibited below average increases of 5.8 percent. Increases by rank tended to be quite uniform within each institutional category and type.

There is little to be said about changes in absolute salary levels. The private independent institution advantage continues in all categories combined, and the church-related institution lags behind. But this is largely a result of the mix of salary levels by category and type. For example, as shown in Table 3, private institutions dominate in Category I; salaries are about equal in category IIA; in Category IIB church-related institutions pay appreciably less than do the public and private institutions; in Category IIC the public institutions pay the most and church-related institutions pay the least; and in Categories III and IV the public institutions dominate over both their private and their church-related counterparts. These are long-standing patterns that are likely to continue.

Salary data for men and women faculty members, shown in Table 4, indicate that women have not yet caught up with their male counterparts. We might expect salary differences to be smallest at the assistant professor level because most people at that rank are relatively recently hired and have presumably been less actively discriminated against than might have been the case for women now at the associate and full-professor ranks. If this is true, average salaries for newly hired assistant professors should reveal little or no differences, at least within disciplines; the same should apply to assistant professors. That may well be the case, but if so the only other factor that could account for differences in average salaries is the different distribution of men and women faculty members by discipline. Typically, women faculty members are concentrated in the humanities and other low-salary fields; this contrasts with males who by and large are concentrated in higher paying fields such as the sciences, engineering, and the other professional schools. Thus, overall average salary levels could differ even though average salaries are equal for men and women within each field.

SALARIES BY DISCIPLINE

Partial confirmation of this view is provided by table III which shows the wide range of starting salaries by discipline. Differences in salaries by discipline continue to widen, as illustrated by average salary data for full professors and for new assistant professors in land-grant colleges and universities. Percentage salary increases for full professors again this year were slightly higher in the professional and scientific disciplines. The disparities were considerably greater, however, for new assistant professors. The strength of demand for business, computer information, and engineering faculty members seems to have tapered off somewhat. Still, the increases recorded for these disciplines continue to be substantial relative to the humanities. When these increases are added to those reported from 1976–77 to 1984–85, it is clear that the faculty salary structure has changed dramatically. And there certainly are no signs yet that it is reverting back to what it once was.

FRINGE BENEFITS

Fringe benefits continue to increase. Compared to two years ago, fringe benefits as a percentage of salary have risen from 20.3 to 21.8 percent in public institutions,

TABLE II

Percentage Increases in the Consumer Price Index and Average Salary of Continuing Faculty, Monetary and Real,[1] 1975–76 thru 1985–86

[1] Taken from the 1985-86 and 1984-85 Faculty Salary Surveys by Discipline of Institutions Belonging to the National Association of State Universities and Land-Grant Colleges, conducted by the Office of Institutional Research, Oklahoma State University.

from 20.7 to 22.6 percent in private independent institutions, and from 19.1 to 21.7 percent in church-related institutions. The major contributors to these increases have been rising contributions for pensions and social security and, in the case of private and church-related institutions, increased tuition payments. It appears that the increase in fringe benefits may partially reflect the tax-shelter aspect, the spreading of cafeteria plans, and the increase in mandated benefits such as social security and unemployment compension. To the extent that the smaller private sector feels it must be competitive, its pension contributions will follow those of the dominant public institutions.

COMMITTEE REPORT

The comittee offers its profuse thanks to the almost 2,200 colleges and universities that so generously responded to the salary survey questionnaire sent out by Maryse Eymonerie Associates, which gathers and processes the data for AAUP. We recognize that responding to our annual data request entails time and effort on the part of already busy college and university administrators. We hope that they recognize how indebted the entire profession is for this cooperation. While the benefits of providing these data may seem negligible to those who provide them, the aggregated data as they appear in this report are invaluable to the profession as a whole and to individual campuses in their discussions of salary levels and increases for the coming year.

The committee also thanks Maryse Eymonerie for her outstanding work in bringing this year's survey to a timely and successul conclusion. Thanks to her enormous efforts we are once again able to publish the Committee Z report in the early spring when its usefulness will be most apparent to everyone.

Finally, I wish to thank members of Committee Z for their service, namely, Ronald Ehrenberg, Hirschel Kasper, and Diane Zannoni; also Carl Patton (consultant to the committee).

W. LEE HANSEN (Economics)
University of Wisconsin-Madison
Chair, Committee Z on the
Economic Status of the Profession

No Rank	36,8	30,7	27,1	23,4	20,5	44,2	38,1	33,1	28,0	24,7

[1] Interpretation of the ratings: 1* = 95th percentile; 1 = 80th percentile; 2 = 60th percentile, etc. Average Salary and/or compensation lower than the 20th percentile will be rated 5. An average salary of 48,6 for the rank of professor in Category I institutions would be rated 2 because it falls between the 60th and 80th percentiles or is higher than 47,4 but less than 51,9, which is the average needed to a rating of 1 or the salary level of the 80th percentile.

For definition of categories, see Explanation of Statistical Data preceding Appendix I.

TABLE 7

Average Fringe Benefits in Dollars and as a Percentage of Average Salary, by Affiliation and Itemized Benefits, 1985–86 (All Ranks Combined)

Itemized Benefits	All Combined	Public	Private Independent	Church-Related	All Combined	Public	Private Independent	Church-Related
	IN DOLLARS				AS A PERCENTAGE			
Retirement	3224	3499	3015	1892	9.7	10.5	8.5	6.8
Medical Insurance	1351	1433	1218	1064	4.1	4.3	3.5	3.8
Disability Income	96	87	119	114	.3	.3	.3	.4
Tuition	252	56	757	642	.8	.2	2.1	2.3
Dental Insurance	51	59	30	37	.2	.2	.1	.1
Social Security	1870	1807	2145	1824	5.7	5.4	6.1	6.6
Unemployment Comp.	92	73	144	125	.3	.2	.4	.5
Life Insurance	113	101	157	114	.3	.3	.5	.4
Workmen's Comp.	125	121	144	123	.4	.4	.4	.4
Benefits in Kind	98	59	268	72	.3	.2	.8	.3
All Combined	7273	7293	7997	6008	22.0	21.8	22.6	21.7

Notes: For the purpose of this survey, the social security tax has been calculated at 7.05 percent of the first $39,600 of salary; retirement contribution by the institution (or state) is included regardless of the plan's vesting provision; tuition includes both waivers and remissions; dental insurance might be somewhat underestimated because a significant number of institutions report the premiums under "medical insurance." Similarly, the medical insurance premiums might be somewhat overestimated because dental is sometime included in amount reported. For the majority, benefits in kind include moving expenses, housing, and other benefits with cash options. In the case of public four-year institutions in Texas, it also includes a portion of the employee's contribution to social security which is paid by the state. For additional information on the reporting of fringe benefits, see Explanation of Statistical Data preceding Appendix I. Averages may not add up because of rounding.

IV }					(IV) 500	450	30	20
Total:	2,674	1,405	620	649	2,159	1,217	440	502

[1] The total number of *campuses* as opposed to institutions included in the National Center for Education Statistics universe for 1983–84 (i.e., the most recent directory available) was 3,284. Institutions that do not utilize full-time faculty or whose faculty donate their time and institutions with fewer than five faculty members have been excluded from the survey conducted by Maryse Eymonerie Associates. Additionally, some institutions submit reports combining data for their separate campuses and/or branches; these institutions are counted as one entity when surveyed. The above figures do not include institutional reports received after the deadline or from the medical schools. Data for medical school preclinical departments will appear in the next issue of *Academe*.

____

(Institution and/or Address)

Enclosed is our check in the amount of $______. For those requesting Table MEA, the delivery time is one to two weeks after receipt of the order.

Note: For special tabulations (i.e., other than those listed above), please contact Maryse Eymonerie Associates, P.O. Box 520, McLean, Virginia 22101, tel. (703) 448-8519.

EXPLANATION OF STATISTICAL DATA

Instructional Faculty. The instructional staff faculty is defined as those members of the instructional/research staff who are employed on a full-time basis and whose major regular assignment is instruction, including those with released time for research. Institutions are asked to exclude (1) instructional faculty who are employed to teach less than two semesters, three quarters, two trimesters, or two four-month sessions, (2) instructional faculty in preclinical and clinical medicine, (3) instructional faculty who are employed on a part-time basis, (4) administrative officers with titles such as dean of students, librarian, registrar, coach, etc., even though they may devote part of their time to classroom instruction and may have faculty status, and (5) undergraduate or graduate students who assist in the instruction of courses, but have titles such as teaching assistant, teaching fellow, etc.

Salary. This figure represents the contracted salary excluding summer teaching, stipends, extra load, or other form of remuneration. Where faculty members are given duties for eleven or twelve months, salaries are converted to a standard academic-year basis by applying a factor of 9/11 or 81.8 percent or by the official factor used in a publicly announced formula which is reflected in a footnote in the Appendix Tables of this report.

Fringe Benefits. In general, the major benefits include those where the institution (or state) makes a definitive payment of a specified amount on behalf of and for the benefit of the individual faculty member. The major benefits include the institution's (or state's) contribution for: (1) Social Security (for consistency, the previously announced rate of 7.05 percent of the first $39,600 of salary has been used in calculating these payments, (2) retirement contributions (the employer's contributions are included regardless of the plan's vesting provision), (3) medical insurance, (4) life insurance, (5) dental insurance, (6) disability income protection, (7) unemployment compensation, (8) workmen's compensation, (9) tuition for faculty children (both waivers and remissions are included), (10) other benefits in kind with cash alternatives (for the majority, these include benefits such as moving expenses, housing, bonuses, etc.). Since the objective of the study is the measurement of income available for personal consumption, as distinct from professional purposes, benefits of a professional nature (such as convention travel, membership fees, grading assistance, faculty clubs, etc.) are not included.

Compensation. Compensation represents salary plus the institution's (or state's) contribution to major fringe benefits.

Rating of Average Salary and Average Compensation. The rating is based on the actual distribution of average salaries and/or average compensations for comparable institutions. For definition of comparable institution, see definition of categories and the explanation of ratings in Column (2) below.

Definition of Categories. The definition given here is similar to that of the National Center for Education Statistics (NCES). The roman numerals are used for the purpose of this report and the NCES identification is given in parentheses.

Category I (Doctoral-Level Institutions). These are institutions characterized by a significant level and breadth of activity in and commitment to doctoral-level education as measured by the number of doctorate recipients and the diversity in doctoral-level program offerings. Included in this category are those institutions that are not considered specialized schools (see Category IIC below) and which grant a minimum of thirty doctoral-level degrees. These degrees must be granted in three or more doctoral-level programs.

Category IIA (Comprehensive Institutions). These institutions are characterized by diverse post-baccalaureate programs (including first-professional), but do not engage in significant doctoral-level education. Specifically, this category includes institutions not considered specialized schools in which the number of doctoral-level degrees granted is fewer than thirty or in which fewer than three doctoral-level programs are offered. In addition, these institutions must grant a minimum of thirty post-baccalaureate degrees and either grant degrees in three or more post-baccalaureate programs or, alternatively, have an interdisciplinary program at the post-baccalaureate level.

Category IIB (General Baccalaureate Institutions). These institutions are characterized by their primary emphasis on general undergraduate baccalaureate-level education. They are not significantly engaged in post-baccalaureate education. Included are institutions which are not considered as specialized and in which the number of post-baccalaureate degrees granted is fewer than thirty or in which fewer than three post-baccalaureate-level programs are offered and which either (a) grant baccalaureate degrees in three or more program areas, or (b) offer a baccalaureate program in interdisciplinary studies.

Category IIC (Specialized Institutions). These are baccalaureate, or post-baccalaureate institutions that are characterized by a programmatic emphasis in one area (plus closely related specialties), such as business or engineering. The programmatic emphasis is measured by the percentage of degrees granted in the program area. An institution granting over 60 percent of its degrees in one program area *and* granting degrees in fewer than five baccalaureate program areas is considered to be a specialized institution.

Category III (Two-year Institutions with Academic Ranks). These are institutions that confer at least 75 percent of their degrees and awards for work below bachelor's degree.

Category IV. The definition is the same as that of category III but these two-year colleges do not use the standard academic ranks. These institutions are listed in Appendix II of this report.

Definition of data presented in Appendixes I and II:

Col. (1) Institution's Category—The definition of Categories is given above.

Col. (2) Ratings of Average Salary—Each rating represents the percentile interval in which the institution's average salary in a given rank lies (1* = 95th percentile or above, 1 = 80th percentile to 94.9%; 2 = 60th percentile to 79.9%, etc.). An average salary lower than the 20th percentile is rated 5. The ratings have been assigned using the actual average salary which is then rounded to the nearest hundred for publication in Col. (3). Because of the lack of homogeneity within category IIC institutions, no ratings are assigned to institutions in that group.

Col. (3) Average Salary by Rank and for All Ranks Combined—This figure represents the average contracted salary (adjusted to a standard academic-year basis, when necessary) excluding summer teaching, extra load, etc., which has been rounded to the nearest hundred dollars; an entry of 33.3 would stand for an average salary between 33,250 and 33,349. The All Ranks (AR) figure includes the rank of lecturer which is not displayed here.

Col. (4) Rating of Average Compensation—Same definition as that given for Col. (2) above, but for compensation which is salary plus fringe benefits.

Col. (5) Average Compensation by Rank and for All Ranks Combined—This figure represents the average salary plus average fringe benefits and as for average salary, the figure has been rounded to the nearest hundred dollars.

Col. (6) Benefits as a Percentage of Average Salary—This percentage which has been rounded to the nearest unit represents the overall percentage of fringe benefits as a percentage of average salary for all ranks combined.

Col. (7) Percentage of Tenured Faculty—This percentage is that of tenured faculty in a given rank.

Col. (8) Percentage Increase in Salary for Continuing Faculty—The percentage increase in salary is that for continuing faculty or faculty members remaining on staff in 1985-86. This figure represents an increase in salary for *individuals* as opposed to a change in salary levels for a given rank from 1984-85 to 1985-86. For the purpose of reporting this information, the institution is asked to provide the data by rank but using, in a case of promotion, the rank held in 1984-85. Therefore, the increase shown is that of individuals in a given rank during academic year 1984-85. This figure reflects both across-the-board and promotion increments.

Col. (9) Number of Full-time Faculty Members by Rank and by Gender—This number represents the total number of full-time faculty in a given rank.

Col. (10) Average Salary by Rank and by Gender—These figures, like those in Col. (3), have been rounded to the nearest hundred dollars. The average is not shown and is replaced by dashes when the number of individuals in a given rank and/or gender is five or fewer. This policy has been adopted to protect the confidentiality of individual salaries.

Cautionary Notes

With the exception of the number of faculty members shown in Col. (10), data are not given when the number of individuals in a given rank and/or gender is five or fewer. This policy was adopted to protect the confidentiality of individual salaries and because an average with so few individuals could be misleading when used for comparison purposes. In such cases, dashes appear in the affected columns.

The data presented in this report were gathered by Maryse Eymonerie Associates which conducted a survey including 2,674 colleges and universities. Institutions that do not employ full-time faculty or have only faculty members who donate their time or had fewer than five full-time faculty members in 1984-85 were not included. The questionnaire used by Maryse Eymonerie Associates is Form MEA 22.

Average Salary and Average Compensation are likely to be affected by a number of peripheral influences. For example, an institution may use a high proportion of part-time graduate assistants whose compensations are not included in the average figures for full-time faculty. Figures for these institutions, therefore, overstate the typical remuneration of those who carry the teaching burden. Average figures for small institutions may also be influenced by the fact that in a given year a relatively large number of their higher paid faculty may be on leave without pay or may have retired. In addition, actual improvements in the economic well-being of the faculty may be concealed in any given year by promotions, which can exercise a double-edged effect upon the average reported in both the higher and lower ranks. Unfortunately, we have found no feasible way to make appropriate adjustments for these occurrences and can only caution the reader to keep these points in mind.

[Note: It has been pointed out that Figure 1 in the 1984-85 report of Committee Z contains two errors. For the years 1971-72 to 1972-73 and 1980-81 to 1981-82 there were small but positive increases in real salary levels, in the amounts of 0.1 and 0.3 percent, respectively.]

Data for preclinical departments of medical schools will appear in the next issue of *Academe*.

NOTES TO APPENDIXES I AND II

For the purpose of this survey, 12-month data are converted to a standard academic year basis. A factor of 9/11 (or 81.8 percent) is used to convert twelve-month salaries except when the institution has a different formula. The first twenty-five footnotes are used to indicate which formula has been used to convert twelve-month data for specific institutions.

1. A factor of 75.0
2. A factor of 76.9.
3. A factor of 80.0.
4. A factor of 83.3.
5. A factor of 85.7.
6. A factor of 90.0.
7. A factor of 86.0.
8. A factor of 95.0.
9. A factor of 85.5.
10. A factor of 86.4.
11. A factor of 86.9.
12. A factor of 90.9.
13. A factor of 79.2.
14. A factor of 87.5.
15. A factor of 91.7.
16. A factor of 66.7.
17. A factor of 72.2.
18. A factor of 76.6.
19. A factor of 78.0.
20. A factor of 78.1.
21. A factor of 82.2.
22. A factor of 83.0.
23. A factor of 83.4.
24. A factor of 85.0.
25. A factor of 92.3.
26. Salary negotiations were still under way at time of submission. Therefore, data do not reflect 1985–86 increase.
27. Fringe benefits have been estimated by Maryse Eymonerie and based on information given in previous years.
28. The retirement component does not include the contribution made for unfunded retirement liability.
29. The data shown under *men* include both men and women combined.
30. The overall compensation also includes a portion of the employee's contribution to the Federal Social Security Program which is paid by the state (5.85 percent of first $16,500).
31. *Faulkner University*—Formerly known as Alabama Christian College.
32. *University of Montevallo*—Data include only faculty with 9-month contracts.
33. *University of Colorado Health Science Center*—Data also include the School of Dentistry.
34. *Mercer University in Atlanta*—Data also include the Merce School of Pharmacy.
35. *Illinois Eastern Community Colleges*—Data include Frontier Community, Lincoln Trail, Olney Central, and Wabash Valley Colleges.
36. *National College of Education*—Data include campuses in Evanston, Chicago, Lombard, Illinois, and Creve Coeur, Missouri.
37. *Western Illinois University*—The average salary for the rank of Associate Professor published in the 1984–85 Annual Report was incorrect. The average for men was 27,8 rather than 34,7; the overall average for rank (men and women combined) should have been shown as 27,5 instead of 33,0.
38. *DePauw University*—The average salary and average compensation (men and women combined) for the rank of Assistant Professor published in the 1984–85 Annual Report should have been shown as 23,8 and 30,7 instead of 23,7 and 29,1, respectively.
39. *Indiana University-Northwest*—The percentage increase in salary for continuing faculty in the rank of Associate Professor published in the 1984–85 Annual Report should have been shown as 5.8 rather than 5.9 percent.
40. *Indiana Vocational Technical Colleges*—Data include all 13 campuses.
41. *University of Southern Indiana*—Formerly known as Indiana State University Evansville.
42. *Eastern Iowa Community College District*—Data include Scott, Clinton, and Muscatine Community Colleges.
43. *Iowa Lakes Community College*—Data also include the North Attendance Center.
44. *Kansas Wesleyan*—The average salary for the rank of Assistant Professor published in the 1984–85 Annual Report should have been shown as 15,3 instead of 9,9.
45. *Northern Kentucky University*—Data do not include the Chase College of Law.
46. *Watterson College*—Data include the entire Jostens Education Systems, Inc. with campuses in Georgia, Kentucky, Maryland, Missouri, North Carolina, and Pennsylvania.
47. *Louisiana State University and Agri. & Mech. College*—Data also include the Center for Agricultural Science & Rural Development and the Law School.
48. *Charles County Community College*—Data also include the Smallwood Village Center, the Colleges at St. Mary's County and Calbert County.
49. *Essex Community College*—Average Compensation by rank published in 1984–85 did not include fringe benefits. The averages by rank should have been shown as 50.3, 40.5, 34.6, 27.3, and 41.0 for the ranks of Professor, Associate, Assistant, Instructor, and All Ranks Combined, respectively.
50. *Peabody Institute of Johns Hopkins University*—Data apply only to the faculty in the Conservatory.
51. *University of Baltimore*—Data include the Yale Gordon College of Liberal Arts and the School of Business.
52. *Lesley College*—Data published in the 1984–85 Annual Report were subsequently revised. The average salary for the ranks of Professor and Instructor should be 28.1 and 17.7 rather than 27.6 and 18.1, respectively.
53. *Arrowhead Community College-Region*—Data include Hibbing, Itasia, Mesabi, Rainy River, and Vermilion Community Colleges. 1985–86 salary was still under negotiation at time of submission.
54. *University of Nebraska at Omaha*—Data do not reflect 1985–86 salary increase.
55. *New Hampshire College*—Data are for the School of Business only.
56. *Alfred University*—Data also include the New York School of Ceramics at Alfred.
57. *College of Saint Rose*—Data include only lay faculty.
58. *Columbia University*—Data do not include Applied Science faculty.
59. *Cornell University (Endowed College)*—Data include the College of Architecture, Art and Planning, Arts and Sciences, Engineering, the School of Hotel Administration, the Law School, the Graduate School of Business and Public Administration and Nutrition.
60. *Hebrew Union College*—Data include New York, Cincinnati, and Los Angeles campuses. Because Hebrew Union-Jewish Institute of Religion, which is predominantly a graduate institution, has a very substantial portion of its faculty at the full professor level at the top of the scale, average salary and average compensation figures reflect an upward skewing for this institution which can be deceptive.
61. *Salve Regina-Newport College*—The compensation figures published in the 1984–85 Annual Report were erroneous. These figures did not include the institution's contribution to fringe benefits, data which were not available at time of submission.
62. *Augustana College*—The average salary for the rank of Associate Professor published in the 1984–85 Annual Report was incorrect. The average for both men and women combined should have been 24.3 rather than 19.9; the average for women 22.8 rather than 2.8.
63. *George Mason University*—The percentage of tenured full professors published in the 1984–85 Annual Report was erroneous. This figure should have been 87 percent.
64. *Virginia Intermont College*—A 5 percent bonus was given to all returning faculty. This bonus, however, is not reflected in 1985–86 base salary.
65. *University of Puget Sound*—Data do not include the Law faculty.
66. *University of Redlands*—Salary increases for continuing faculty published in the 1984–85 Annual Report were erroneous. The overall increase for those remaining on staff averaged 7 percent.
67. Fringe benefits have been estimated. Salary negotiations still under way. The data taken from the Chancellor's annual report on staffing and salaries are shown under *men* and include both men and women combined.

AAUP Support Offered to Kemp

The governing board of AAUP's Academic Freedom Fund has approved a loan to Professor Jan Kemp, whose recent legal dispute with the University of Georgia has attracted national attention.

On February 12, a jury in a federal court in Atlanta awarded more than $2.5 million to Professor Kemp, a former remedial English instructor at the University of Georgia, who charged that two university administrators had dismissed her from the faculty because she had protested publicly about preferential treatment given to athletes in the Developmental Studies Program.

Professor Kemp was initially appointed as Instructor in and Coordinator of the English section of the Developmental Studies Program in the fall of 1978. The program offers noncredit remedial courses in English, reading, and mathematics to freshmen whose high school grades and test scores would otherwise prevent them from gaining admission to the regular academic curriculum and is intended to help the students reach the level of proficiency to cope with credit courses in the regular curriculum. At the University of Georgia each year the program typically enrolls about 300 academically ill-prepared students, of whom some 10 to 20 percent are athletes. Policies governing academic performance in developmental studies require that students achieve passing grades in their courses within four quarters. If they fail to do so, according to these policies, they are automatically expelled from the university.

Professor Kemp, by all accounts a very successful teacher, curriculum developer, and adviser, was promoted to the rank of assistant professor in the fall of 1980. Beginning in the spring of 1981, however, she became embroiled in a series of progressively more serious disputes with her immediate administrative superiors, Dr. Leroy Ervin, assistant vice president for academic affairs and director of the Division of Developmental Studies, and Dr. Virginia Y. Trotter, vice president for academic affairs. In March 1981, according to Professor Kemp, she refused Dr. Ervin's request that she instruct another remedial English teacher under her supervision to change the failing grades of five scholarship athletes to "incompletes," whereupon he berated her and compared her importance to the university—unfavorably—to that of a star basketball player. The grades, she says, were eventually changed, despite her opposition.

Professor Kemp's most serious confrontation with university administrative officers occurred in late December 1981 and early January 1982 and focused on her challenge to the practice of giving preferential academic treatment to athletes enrolled in developmental studies—a practice intended to keep them academically eligible and thereby enable the university to field successful revenue-producing athletic teams. At the end of the fall quarter, their fourth and final quarter in developmental studies, nine varsity football players had failed to pass the remedial English course they were required to complete in order to remain at the university. The nine athletes would have faced dismissal from the university under normal policy—as was the case with one nonathlete in remedial English who had been performing at the same level—but for the fact that Vice President Trotter over the Christmas break intervened to give the football players "administrative exits" from the program and admittance into the regular curriculum, thus allowing them to remain enrolled and to retain their eligibility to play in the Sugar Bowl game on New Year's Day. Professor Kemp was prominent among a group of faculty members in developmental studies who criticized the administration's actions as undermining the academic integrity of the program.

On February 3, 1982, Vice President Ervin, having previously removed Professor Kemp from various faculty committees, removed her as coordinator of the remedial English program and subsequently reduced her from a twelve-month to a nine-month contract. In September Dr. Ervin advised Professor Kemp that her faculty appointment would not be renewed for the 1983–84 academic year. The following month (October 1982) she filed suit in federal district court, charging university officials with demoting her and denying her reappointment in retaliation for having spoken out on issues of academic concern and exercising her constitutionally guaranteed rights of free speech.

After several delays and postponements, the trial of Professor Kemp's suit began on January 13, 1986. Professor Kemp, who had taken a position as part-time English instructor at Southern Technical Institute in Marietta, Georgia, following her release from the University of Georgia, was seeking reinstatement, back pay, and punitive and compensatory damages. On February 12, a six-member jury found that she had been wrongfully denied reappointment and awarded her $2.57 million. The state of Georgia is contesting both the verdict and the award.

In the wake of the Kemp trial, the Board of Regents of the University System of Georgia announced an investigation of the remedial studies program at the University of Georgia. Pending completion of their investigation, the regents have twice voted to defer the reappointment of university president Fred C. Davison, who during the trial had defended the actions of Dr. Trotter and Dr. Ervin and sought to justify the admission and retention of athletes with academic deficiencies. On March 13 Davison announced his resignation, effective July 1, from the presidency.

In the course of pursuing her suit, Professor Kemp has incurred substantial personal debts. These debts, excluding court costs and attorneys' fees, reportedly run to some $100,000. Despite the trial court's sizeable monetary award, Professor Kemp has received nothing from her lawsuit as of this writing. A settlement offer of $750,000 was put forth by the attorney general's office, but Professor Kemp declined it, in significant part because it included no provisions for changes in the practices to which she had objected.

The Georgia Conference of AAUP and the local AAUP chapter at the University of Georgia have both endorsed the solicitation of funds for

Professor Kemp to help her pay immediate debts and have established a "Friends of Jan Kemp" committee for that purpose. In addition to fund-raising efforts by AAUP leaders in Georgia, the governing board of the Academic Freedom Fund recently approved a short-term emergency loan in the amount of $5,000 to Professor Kemp to help see her through her current financial difficulties. In recommending the loan to the governing board, the Association's staff concluded: "The issues of academic freedom posed by the Kemp case—reflected in the changing of grades, the unwillingness to implement student dismissals, and the decision not to reappoint the faculty member who objected to these assaults on academic integrity—seem to us to warrant Association support."

Cornell Rejects Supercomputer Grant

Cornell University has initially turned down a $10 million grant for a new campus "supercomputer" because the money was granted by the U.S. Congress without the traditional academic merit-review procedures.

Cornell had previously joined several other research universities in condemning specially earmarked funds granted without competitive bidding. The large research universities stressed the need for open allocations free of political influence. The merit-review process requires that funds not be allocated without submission of a proposal to be evaluated by a panel of independent scholars. Several administrators at smaller colleges and universities have voiced support of the direct-grant procedure, however, pointing out that money allocated through the peer-review procedures most often goes to a small number of prestigious universities. In the July–August 1985 issue of *Academe* (p. 27), Professor Morton Tenzer wrote of a growing practice whereby colleges and universities hire Washington lobbyists to secure direct appropriations for their institutions, bypassing the merit-review process. Tenzer called this practice "the new pork barrel in higher education."

The money granted to Cornell, in a bill sponsored by Senator Mark Hatfield (R-Oregon), was part of a $65.6 million allocation that also awarded grants to nine other academic institutions. Cornell officials said that they would accept the grant if it was made subject to competitive bidding, and university officials have received recent assurances that the Department of Defense would be conducting a review process for the awarding of the supercomputer contract. Noting that Cornell University feels that the project will produce "technology that is important to the nation and to science," Cornell's vice president for university relations, John Burness, stated, "It is our understanding that there will be a competition and we hope to be successful in that competition."

Tax-Free Tuition Remission for Teaching Assistants Expires

On December 31, 1985, several provisions of the federal tax code affecting higher education expired despite efforts to extend them. One such provision had important implications for teaching and research assistants. The provision, Section 127, permitted employees to receive tax-free financial assistance up to $5,000 from their employers. In most instances, the assistance is provided by companies to employees enrolled in work-related higher education programs. In 1985, Section 127 was amended to include tuition remission for those teaching and research assistants who are designated as "employees" by their institutions. When Section 127 expired, the tax-free tuition remission for those teaching and research assistants also expired.

Legislation to extend Section 127 for two years passed the House as part of the tax reform bill, H.R. 3838. The draft tax reform proposals introduced by Senator Robert Packwood (R-Oregon) include permanent tax-free status for educational assistance programs. Separate legislation to make Section 127 permanent is pending in both the House and Senate, but it is unclear at the present time when the House and Senate leadership will come to an agreement on the separate legislation.

General Secretary Reappointed

Ernst Benjamin has accepted reappointment as general secretary of the AAUP for a four-year term commencing in June 1986. The Association's Council voted at its November 1985 meeting to reappoint Benjamin to the position.

In announcing the reappointment, President Paul H.L. Walter said, "I am delighted that Ernie has decided to continue as general secretary. During his eighteen months in the position, the Association has improved its financial position, clarified its joint-venture arrangements, and strengthened its ties with other higher education organizations. I am confident that, with Ernie as general secretary, this progress will continue."

Benjamin Testifies at Retirement Hearing

AAUP General Secretary Ernst Benjamin testified on pension plans at a February hearing sponsored by the Commission on College Retirement.

In his testimony, Benjamin emphasized that highest priority must continue to be given to adequate funding and to portability of benefits. Increased flexibility with regard to investment and payout options may be desirable, but the limitless flexibility which would accompany complete "deregulation" is not necessarily in the best interest of the professoriate. Benjamin explained to *Academe* that "since flexibility and the promise of higher returns will always tempt a significant number of participants, I believe the shift to a competitive market for faculty pension plans may lead to a decline in institutional responsibility and individual security."

Benjamin spoke as a member of a select committee on retirement issues, representing the major Washington-based higher education associations. The committee has agreed on the importance of preserving the role of TIAA-CREF as the primary provider of vested and portable faculty pension plans, and has agreed on the importance of working with TIAA-CREF on reforms which would allow it to continue in that role.

The committee expressed its concern with TIAA-CREF's inadequate legislative and public relations activity, unresponsive governance, and inadequate counseling and information. In addition to Benjamin's emphasis on adequate funding, Robert Carr of the National Association of College and University Business Officers emphasized the need for more flexible investment and payout provisions.

The Carnegie-sponsored Commission on College Retirement will issue a series of reports on issues related to retirement, including retirement age, financial planning, and long-term care. Its first report, on retirement ages for college and university faculty, has recently appeared.

Excellence In Education
edited by Philip G. Altbach, Gail P. Kelly, and Lois Weis

Since *A Nation at Risk* was issued by the National Committee on Excellence in Education, school reform has been at the top of the nation's agenda. While everyone agrees that excellence in our schools is a laudable goal, there is much disagreement on how it should be achieved.

In this book, distinguished researchers and practitioners describe and analyze the reports on the state of the nation's schools and their effect on the teaching profession, teacher education, students, and the future of American education. Contributors include Ernest Boyer, author of one of the most influential of the excellence reports, Paul Peterson of the Brookings Institution, Dean Hugh Petrie, Richard Hunter, and other prominent education researchers.

"The professional educator will find this book exhilarating, while the neophyte will find a basis on which to develop his or her own perspectives."

The American University
Problems, Prospects, and Trends
edited by Jan H. Blits

America's institutions of higher education have been forced to reexamine their goals and objectives, as well as the means of achieving them, as a consequence of unprecedented internal and external pressures.

This collection of essays by distinguished scholars and university administrators faces these challenges head-on and suggests new directions for the future. Contributors include C. Harold Brown, Eric Brucker, Alan McClelland, John A. Munroe, Frank B. Murray, David S. Saxon, and others.

177 pages Cloth $18.95

Out of Order
Affirmative Action and the Crisis of Doctrinaire Liberalism
Nicholas Capaldi

Out of Order is the definitive critique of affirmative action. It is a sustained and comprehensive examination of the historical, legal, sociological, economic, moral, and philosophical dimensions of an issue that has tested the national conscience for two decades.

By cutting through the emotional rhetoric and the misperceptions that often surround examinations of affirmative action, the author documents when and how the definition of affirmative action shifted from equality of opportunity to equality of result and group entitlement.

"A severe scrutiny of the policy of affirmative action."

The AAUP Term Life Insurance Plan premiums have been reduced **10%**

That's right! Now you can save even more on AAUP Term Life Insurance. In addition to the rate reduction, the AAUP Life Plan has established a sound record of premium returns to members. In 1984, 15% was returned to members participating in the Term Life plan. And in 1985, members received a 30% credit!

And that's not all:

- Up to $150,000 coverage is available for you and your spouse.
- Non-smoking members save an additional 5% on their premiums.
- Your children can be insured for $2,500 each.

Take advantage of your AAUP membership today. For more information, complete the coupon below and mail it to: AAUP Insurance Plans, 400 Locust Street, 8th Floor, Des Moines, Iowa 50398, or call TOLL FREE 800-358-3043. (In Alaska and Iowa call collect 515-243-1776.)

Fulbright Award Competition Opened

The Council for International Exchange of Scholars announced in February that they are now accepting applications for 1987–88 Fulbright grants. In 1987–88 over 300 research grants will be awarded and over 700 grants will be awarded for university lecturing. The grants cover a very wide range of disciplines, and scholars in all academic ranks are eligible to apply. Applications are also encouraged from retired faculty and independent scholars. Application deadlines vary but begin on June 15, 1986. For more information, contact the Council for International Exchange of Scholars, Eleven Dupont Circle, N.W., Washington, D.C. 20036-1257, telephone: (202) 939-5401.

Committee Chairs Appointed

President Paul H.L. Walter has recently announced the appointment of three new committee chairs. Professor Jack H. Schuster (Higher Education, Claremont Graduate School) has succeeded Professor Paul Strohm (English, Indiana University, and *Academe* editor) as chair of the Association's Committee T on College and University Government. Professor Schuster was a featured speaker at the 1985 AAUP Annual Meeting and is the coauthor, with Howard R. Bowen, of *American Professors: A National Resource Imperiled,* published in 1986 by Oxford University Press. Robert K. Webb (History, University of Maryland, Baltimore County) is the new chair of Committee B on Professional Ethics, succeeding Richard Barber (Philosophy, University of Louisville). Professor Webb, a former first vice-president of the Association, will serve until 1988. Dennis Marks (Astrophysics, Valdosta State University) has accepted an appointment as chair of Committee F on Chapters, Conferences, Members, and Dues, replacing David C. Newton, who resigned upon assuming an administrative position at Central Connecticut State University. Professor Marks recently served on a special subcommittee on retrenchment language and was a co-author of "Coping with Retrenchment: Faculty Experiences," which appeared in the May–June 1985 issue of *Academe*.

Theologians Speak Out on Threat to Professor Curran

The following is the text of a statement drafted and approved by various past presidents of the Catholic Theological Society of America and the College Theology Society:

On September 17, 1985, Cardinal Joseph Ratzinger, prefect of the Sacred Congregation for the Doctrine of the Faith, informed Father Charles E. Curran, professor of Moral Theology at The Catholic University of America, Washington, D.C., that unless Father Curran retracted certain views on various official teachings of the Catholic church, Father Curran would not be allowed to continue teaching Catholic theology in the name of the church.

The areas of dissent explicitly mentioned in Cardinal Ratzinger's letter concerned contraception, direct sterilization, abortion, euth[illegible], masturbation, premarital intercourse, homosexual acts, and the indissolubility of sacramental and consummated marriage.

The letter did not specify how Father Curran's writings are at variance with these official teachings, nor does the letter make any claim that any of these teachings fulfill the conditions necessary for an infallible pronouncement. The letter makes clear, nonetheless, that Father Curran's positions "violate the conditions necessary for a professor to be called a Catholic theologian."

The underlying assumption of the letter, therefore, is that dissent from noninfallible teachings effectively places one outside the body of Catholic theologians.

Because many of us are not specialists in moral theology/Christian ethics and, in any case, have not actually seen the Curran dossier, we shall not presume to comment on the specific points of disagreement between Father Curran and the congregation.

However, the letter does raise many serious questions which transcend any specific point of disagreement: (1) Which noninfallible teachings are serious enough to provoke such a result, and how are those teachings determined? (2) How many noninfallible teachings would one have to disagree with before this result would follow, and how is that number determined? (3) If disagreement with any noninfallible teaching of the church is sufficient to provoke this result, on what theological, doctrinal, or historical basis is that principle deduced? (4) If one is declared no longer a Catholic theologian, does that modify in any way the theologian's relation to the Catholic church itself? If so, how? If not, what does such a declaration mean?

One could leave aside entirely such substantive theological questions as these and still be profoundly disturbed by this letter and the threat of action contained in it. If Father Curran's views on the various issues mentioned in the letter are so incompatible with Catholic teaching that he must be declared no longer a Catholic theologian, justice and fairness would dictate that other Catholic theologians who hold similar views should be treated in exactly the same fashion.

Indeed, the credibility of any action on the part of the congregation would be seriously undermined by a failure to identify and act upon other such cases. The problem is, of course, that there are very many Catholic theologians who do dissent from noninfallible teachings.

This threatened action also raises serious questions about the academic integrity of Catholic institutions of higher learning. For many years, enemies of the Catholic church in the United States have argued that Catholic colleges and universities are not independent academic institutions, but are nothing more than educational arms of the official church. If Father Curran were removed from his position as a professor of theology at The Catholic University of America, it would be far more difficult to rebut this charge, and particularly as it might apply to that national institution.

We should like to make one final remark about Charles Curran himself. Father Curran enjoys the complete respect of his colleagues in the American Catholic theological community and beyond. We can think of no Catholic theologian in this country who is more well-liked and personally admired than Charles Curran. He is generous and considerate to a fault, toward colleagues and students alike.

There would be much more than professional distress, therefore, if the contemplated action against him were carried out.

CENSURED ADMINISTRATIONS

Investigations by the American Association of University Professors of the administrations of the institutions listed below show that, as evidenced by a past violation, they are not observing the generally recognized principles of academic freedom and tenure endorsed by this Association, the Association of American Colleges, and more than 100 other professional and educational organizations. The 1940 *Statement of Principles on Academic Freedom and Tenure* may be found in the May 1978 issue of the *AAUP Bulletin*.

This list is published for the purpose of informing Association members, the profession at large, and the public that unsatisfactory conditions of academic freedom and tenure have been found to prevail at these institutions. Names are placed on or removed from this censure list by vote of the Association's Annual Meeting.

Placing the name of an institution on this list does not mean that censure is visited either upon the whole of the institution or upon the faculty, but specifically upon its present administration. The term "administration" includes the administrative officers and the governing board of the institution. This censure does not affect the eligibility of nonmembers for membership in the Association, nor does it affect the individual rights of members at the institution in question.

Members of the Association have often considered it to be their duty, in order to indicate their support of the principles violated, to refrain from accepting appointment to an institution so long as it remains on the censure list. Since circumstances differ widely from case to case, the Association does not assert that such an unqualified obligation exists for its members; it does urge that, before accepting appointments, they seek information on present conditions of academic freedom and tenure from the Association's Washington office and prospective departmental colleagues. The Association leaves it to the discretion of the individual, possessed of the facts, to make the proper decision.

The censured administrations, with dates of censuring, are listed below. Reports were published as indicated by the parenthesized *Bulletin* or *Academe* citations following each listing. Reference should also be had to "Developments Relating to Censure by the Association" and to the "Report of Committee A," each of which appears annually in *Academe*.

South Dakota State Colleges and Universities under South Dakota State Board of Regents (September, 1961, 247-55) Censure was voted specifically on the Board of Regents of Education of the State of South Dakota, with respect to a case which occurred at South Dakota State University. Censure was not directed against the local or central administrative officers. The 1982 Annual Meeting determined that the regents also now have sole responsibility with respect to a case which occurred in 1966 at Northern State College (September, 1968, 306-13).	1962
Grove City College (Pennsylvania) (March, 1963, 15-24)	1963
College of the Ozarks (Arkansas) (December, 1963, 352-59) Censure was voted specifically on the Board of Trustees, and not on the institution's administrative officers.	1964
Nebraska State Colleges (December, 1964, 347-54) Censure was voted specifically on the Board of Trustees of the Nebraska State Colleges, with respect to a case which occurred at Wayne State College. Censure was not directed against the local or central administrative officers.	1965
Amarillo College (Texas) (September, 1967, 292-302)	1968
Southern University (Louisiana) (March, 1968, 14-24)	1968

WASHINGTON WATCH

On March 13 Senator Robert Packwood (R-Oregon), chairman of the Senate Finance Committee, unveiled his draft proposals for a tax-reform bill. It differs sharply from the House bill (H.R. 3838), which was approved on December 17. In the area of faculty pensions, which has been of primary concern to faculty and the AAUP, the Packwood proposals would not apply the restrictive nondiscrimination rules to 403(b) tax-deferred-annuity programs and would not remove the tax-exempt status of TIAA-CREF. While it would reduce the maximum annual employee's contribution to a pension plan to $7,000, the coordination of pension plans and individual retirement accounts would be different from that in the House bill. Rather than the "first dollar offset," as provided in the House bill, the Packwood proposal would apply the principle of the "last dollar offset." Therefore, a person could contribute $5,000 to a pension plan and $2,000 to an IRA; or contribute $6,000 to a pension plan and $1,000 to an IRA; or $7,000 to a pension plan and nothing to an IRA. In his statement introducing his draft proposals, Senator Packwood said his proposal "protects the tax-free status of workers' retirement savings. The House bill would substantially deny American workers the ability to save for their retirement."

At its meeting on February 7–8, Committee R on Government Relations concentrated on three of the several provisions in the tax reform bill affecting higher education. AAUP's primary concern remains faculty pension plans although we participate in several coalitions that are focusing on other provisions. We sent a legislative alert to our Congressional Network on February 10 and then outlined our concerns about provisions affecting faculty pensions in a widely circulated letter to Senator Packwood on February 19. We immediately followed it up with another legislative alert on February 26. A combination of Capitol Hill lobbying and communications to Senators from members of the AAUP Congressional Network have alerted Senators to our concerns and our recommendations.

In our letter to Senator Packwood we urged him to delete from the draft bill he is preparing three provisions of H.R. 3838:

(1) Section 1113, which would impose rules currently applied to pension plans in the profit-making sector to pension plans in the non-profit sector. These rules would eliminate the flexibility of current institutional pension programs, including portability, and would force major restructuring of both pension and retirement programs at virtually every American college and university.

(2) Section 1101, which would apply severe restrictions on coordinated contributions to faculty pension plans and individual retirement accounts. We told Senator Packwood that the restrictions would decrease the amount of funds faculty set aside for retirement and "would defeat the legitimate efforts of faculty to build adequate retirement accounts."

(3) Section 1012, which would arbitrarily remove the tax-exempt status of TIAA-CREF. The impact of such an action would be, according to TIAA-CREF, a decrease in benefits of 1/2 percent per year. We expressed to Senator Packwood our concern that TIAA-CREF could lose its tax-exempt status despite current tax policy that prohibits the taxation of pension funds.

AAUP's commitment to protecting and strengthening faculty pension and retirement programs originated in the earliest days of the organization's development. Committee P on Pensions and Insurance, chaired by Dean Harlan Fiske Stone of Columbia University Law School (later chief justice of the United States), provided in 1917 a series of recommendations to the joint commission appointed at the request of the Carnegie Foundation for the Advancement of Teaching to consider suggestions for establishing a faculty pension plan. In 1918 Teachers Insurance and Annuity Association was created with funds provided by the Carnegie Foundation. As a result of the work of Committee P, AAUP had a set of guidelines that assisted institutions in the development of their retirement policies. In 1950, a study conducted by a joint committee of the Association of American Colleges, which represented institutional presidents, and AAUP led to the adoption of a joint statement of principles on academic retirement. The statement was subsequently revised and expanded in 1958, 1969, and 1980. Today, the *Statement of Principles on Academic Retirement and Insurance Plans* (1980), provides the basis of our concern over the restrictions imposed on faculty pension plans in H.R. 3838.

The future of faculty retirement and pension plans will depend on how the Senate responds to the proposals put forth by Senator Packwood.

ALFRED D. SUMBERG
Director of Government Relations

AAUP

MEMBERSHIP INFORMATION

Individuals interested in the activities of the professoriate and concerned about higher education are invited to join the Association.

Membership dues for 1986 are indexed to the annual Committee Z salary survey.

☐ **Active Full-time:** $68

Eligibility—Individuals at approved institutions[1] who: (a) have faculty status as teachers or researchers; (b) are professional librarians; (c) are counselors with faculty status; or (d) are professional appointees who are included in a faculty collective bargaining unit.

(*Active* members who retire for age may retain their active status and thus the ability to vote and hold office or they may transfer to *emeritus* membership. Administrators whose teaching or research duties are less than half a normal load are not eligible for *active* membership. They are invited to transfer to *associate* membership or to join as *public* members.)

☐ **Active Entrant:** $35

Eligibility—nontenured faculty for up to seven years for new members.

☐ **Active Part-time:** $20

Eligibility—Faculty who receive from an institution of higher education no more than 50 percent of the salary of an equivalent full-time faculty member in a given year, or faculty who are termed part-time under a collective bargaining agreement.

☐ **Graduate Student:** $14

Eligibility—Individuals who are, or within five years have been, doing graduate work in an approved institution.[1]

(One may not hold *graduate student* membership if eligible for *active* membership.)

☐ **Public:** $42

Eligibility—Individuals not eligible for *active, graduate student, associate,* or *emeritus* memberships.

☐ **Joint (Second) Membership:** $34

Eligibility—A husband and wife who are both *active* members may request *joint* membership. They will receive one subscription to *Academe* and the dues of *one* will be reduced. A husband and wife who are both *graduate student* members may request a similar arrangement whereby the dues of one are reduced by $2. (The same $2 *graduate student* reduction is available to a married couple holding an *active* and a *graduate student* membership.)

After eligibility has been determined and membership recorded, new members will receive acknowledgment individually.

MEMBERSHIP BY TRANSFER:

☐ **Associate:** $42

Eligibility—An *active* or *graduate student* member who becomes an administrator with less than half a normal teaching or research program.

☐ **Emeritus:** $14

Eligibility—An *active* or an *associate* member retiring for age may request transfer to *emeritus* membership. *Emeritus* members may not vote in elections or at meetings.

SUSPENSION/RESIGNATION:

A member who wishes to resign or suspend membership should notify the Washington Office in writing. During the period of suspension, which may not exceed two years, the member will remain on the rolls but will not receive dues statements, ballots, or *Academe*. Following the calendar-year suspension, the member will receive a statement for the coming year's dues and will be returned to the *Academe* subscription list.

REINSTATEMENT:

One who wishes to resume membership after it has lapsed should notify the Washington Office in writing and enclose the current year's dues.

MEMBERSHIP INQUIRIES

AAUP, Suite 500
1012 14th St., NW.
Washington, D.C. 20005

---

[1] "Approved institution" means one on the accredited or candidate for accreditation lists of the established regional or professional accrediting agencies, subject to modification by action of the Association. A member may change occupation or transfer to an institution not on the Association's approved list without affecting eligibility for continuance of membership.

WHY JOIN AAUP?
BECAUSE AAUP WORKS.

If You Are a Faculty Member, You Should be a Member of AAUP.

Professional Standards

The academic community relies on AAUP-developed policies for guidance in providing academic due process. The 1940 *Statement of Principles on Academic Freedom and Tenure* has been incorporated into many faculty handbooks. AAUP standards provide for full faculty participation in academic governance and decision making. Federal and state courts have frequently relied on Association policy statements for assistance in resolving academic disputes.

Publications

Academe, the bi-monthly journal of AAUP, publishes all Association policy statements, committee reports, and institutional investigations. Entire issues are frequently devoted to timely subjects of concern to the profession; for example, Salary Discrepancies on Campus, Values and Education, and The Non-Tenure-Track Faculty. *The Annual Report on the Economic Status of the Profession*, containing salary and compensation data on over 2100 institutions, is published each year in *Academe*.

Legislative Activities

AAUP staffs the only Government Relations Office solely concerned with issues affecting faculty members. As a result of AAUP's legislative monitoring, faculty members were alerted to the dangers the Tax Reform Bill posed for academic pension plans. AAUP has consistently resisted budget cuts in student aid and other academic programs proposed by the Reagan Administration. The *AAUP Guide to Action: A Handbook on Lobbying at the State Capitol* is a valuable resource for faculty members working with state legislatures.

Membership Benefits

AAUP membership makes you eligible to enroll in a professional liability insurance plan, in group health and life insurance plans, and in accident and disability income plans. AAUP members are entitled to reduced subscription rates to selected publications and reduced car rental rates. AAUP Gold MasterCards are available to members who qualify for the program.

This is a ☐ New Application or an ☐ Application for Reinstatement. Please do not use this form for renewal of current membership.
